

ORIGIN INSPECTION PROGRAMS (FOOD AND AGRICULTURAL CODE, SECTION 6404)

Florida Pilot Origin Inspection Program

The department has entered into a pilot Origin Inspection Program with the Florida Department of Agriculture and Consumer Services (FDACS) providing for up to five nursery participants. Each of the following approved nurseries has been visited by a department employee. Prior to shipping, each nursery submits a list of plant material to a FDACS inspector who then provides written verification to the department that the plant material meets California=s nursery stock cleanliness standards, any quarantine requirements and qualifies for shipment to California.

After departmental approval of the nursery=s promotional plant material, unique pre-numbered origin inspection stickers are applied to the master bills by FDACS. All shipments of plant material are also sealed by FDACS, enter through a designated agricultural border station, and quality assurance inspections are performed in Arizona, the entry point in California or at interior terminal points. If any plant material is infested/infected with any pest/disease, it is held until proper disposition is determined.

FLORIDA

Approved Nurseries

Certification No.

Commodities

Hermann Englemann Greenhouses, Apopka	FLOI-1280	Promotional shipments only, plant material approved on a case by case basis.
Morning Star Nursery, Delrey Beach	FLOI-1174 approved	Promotional shipments only, plant material on a case by case basis.

CUT FLOWERS INSPECTED AT ORIGIN MAY BE RELEASED

The release of plant material without inspection is limited to the following types when from an approved nursery. This approval does not preclude inspection and sampling and/or testing at the discretion of the destination California Agricultural Commissioner, and rejection is required as a consequence of inspection and/or test(s). (Section 6404, Food and Agricultural Code).
